Reliability through simplicity

Success in Flat Roofing depends upon the optimum solution.

The expected service life of a flat roof is dependent on each and every component. There is only one way to ensure a long and maintenance-free life - by selecting a system of integrated and proven components; i.e. products which can be simply and reliably interconnected.

The alwitra Roofing System offers just this - and nothing less.

Flat Roofs are alwitra's speciality. By designing and manufacturing a Total Roofing System we have become a true market leader, accepted as a benchmark for the roofing industry. Our product range uses the most advanced technology, and the finest raw materials available.

alwitra - the no-compromise solution.

A system of technically-advanced roofing products – fully-integrated for proven flat-roofing solutions:

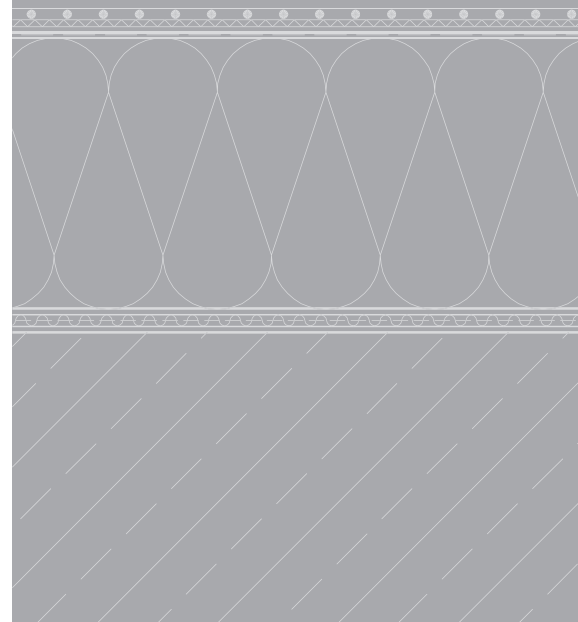

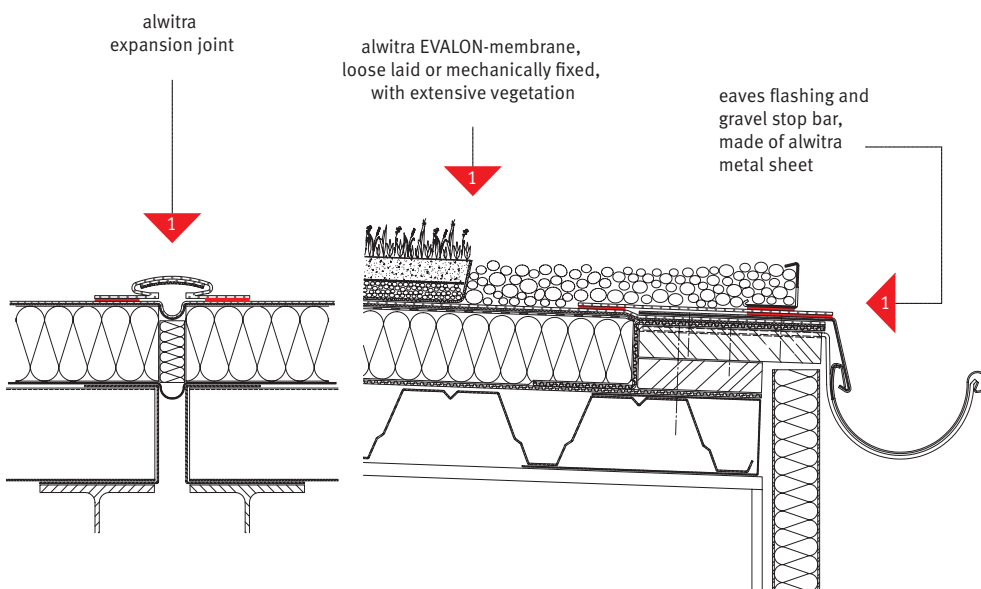

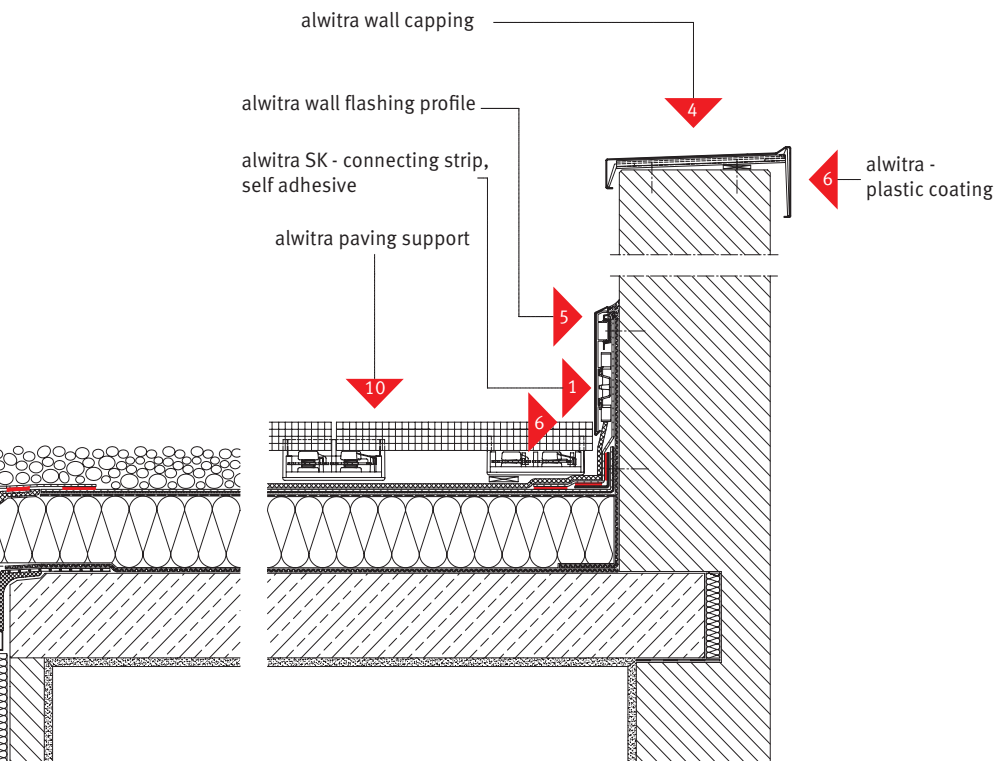

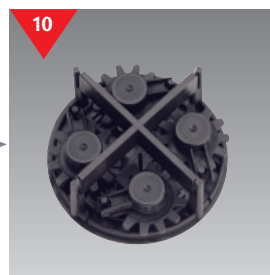

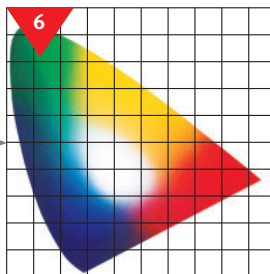

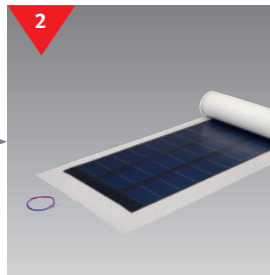

alwitra. The ultimate roofing system.

All components of this superior Flat Roof System have one common characteristic – connecting flanges, strips etc are all formed in the same VET as the EVALON membrane. Homogeneously welded seams are therefore simple to achieve.

- ▶ All joints are homogeneously welded, using hot air or with solvent agent.
- ▶ The membrane remains permanently weldable (no vulcanisation).
- ▶ All products surpass current European standards.

- ▶ Advanced
- ▶ Durable
- ▶ Reliable
- ▶ Secure and
- ▶ Economical

through a combination of quality in

- ▶ Function
- ▶ Design
- ▶ Construction
- ▶ Technology

for both

- ▶ New Work and
- ▶ Refurbishment

Your benefits:

- ▶ Expert advice from our experienced Technical Consultants
- ▶ Complete product support service from planning to installation.
